SOCIAL WORK INTERNSHIP ACTIVITIES SHEET

This form gives an overview of social work internship at our centre

Our Centre values social work and provides an enriching opportunity for student social workers to grow their practice knowledge and practical skills. We offer areas of training as follows:

1. Understanding the role of social work in epilepsy management in particular and in health and disability in general
2. Family work, casework, group, community work and policy work.
3. Administration where you learn basis office and management skills
4. Creative component where you get to create your own project.
5. Research

Use the checklist below to understand specific knowledge and activities as you go:

Item	Activities	Tick if done
